

Shipyard Tour of the New Research Vessel

The research team is extending an invitation to property owners to tour the new research vessel while under construction at All American Marine, Bellingham. The tour will provide property owners and other stakeholders a first-hand view of the ship's low wake design features including the innovative hull shape, composite super structure, trim control and performance monitoring system. We encourage you to take this opportunity to learn more about the new vessel and the plans for testing and validation.

The tour will be held on February 9,
1:00 to 3:00 pm at All American Marine
200 Harris Avenue Bellingham, WA 98225
